

BILEL HEDHLI

Full-Stack Engineer · Technical Lead · AI Integration

Tunis, Tunisia · Available for international remote & contract roles

bilelhedhli@gmail.com · +216 51 531 353 · rotro.github.io · linkedin.com/in/bilel-hedhli

PROFESSIONAL SUMMARY

Full-stack engineer with 5+ years shipping production web, mobile, and AI-integrated systems for startups and clients across healthtech, aquaculture-tech, and e-commerce. Strong across the TypeScript stack (Angular, Node.js/NestJS, React/Next.js, Ionic) with hands-on AWS deployment and CI/CD, and a recent focus on integrating LLM and voice-AI capabilities into real products. Comfortable owning delivery end-to-end while working remotely with distributed, international teams. Contributed engineering on eSteps Health, first-prize winner of Orange's POESAM 2023 healthtech award.

CORE SKILLS

- **Languages & Frameworks:** TypeScript, JavaScript, Angular, Node.js, NestJS, React, Next.js, Ionic/Capacitor, Flutter
- **Backend & Data:** REST APIs, MongoDB, MySQL, Firebase, Spring Boot
- **Cloud & DevOps:** AWS (EC2, architecture, deployment), Docker, CI/CD pipelines, Git/GitHub
- **AI Integration:** LLM integration, voice-AI pipelines (STT / LLM / TTS), computer-vision features
- **Ways of Working:** Agile/Scrum, system design, remote & async collaboration, technical leadership

EXPERIENCE

Full-Stack Engineer — RMSoftwareJan 2026 – Present

Remote

- Build full-stack applications across Angular, NestJS, Flutter, and Ionic/Capacitor.
- Design and maintain AWS-based architecture, focused on scalability, security, and performance.
- Own system design and deployment strategy, including microservices structure and authentication/authorization flows.

Technical Lead — Aquadeep (AI Aquaculture)Jun 2024 – Dec 2025

Tunis, Tunisia / Remote

- Led engineering for an AI-driven aquaculture platform — a POESAM 2023 second-prize startup — applying computer vision to optimize and monitor farm production.
- Built image-analysis pipelines that convert annotated image data (W3C annotations) from pixel space to real-world measurements for automated organism counting.
- Established AWS deployment and CI/CD workflows and set development priorities across the delivery cycle.

Full-Stack Engineer — eSteps Health (Healthtech)May 2023 – Mar 2024

Remote · Boston, MA-based startup

- Contributed backend and full-stack development on a healthcare SaaS platform with real-time patient monitoring (Node.js, Angular, AWS).
- Modeled and optimized MongoDB collections and queries to support responsive real-time dashboards.
- Member of the engineering team behind the product that won first prize at Orange's POESAM 2023.

IT Project Manager — NOVASOLVDFeb 2022 – May 2023

Tunis, Tunisia

- Managed delivery of client IT projects with structured roadmaps, timelines, and milestones.
- Modernized legacy codebases and introduced automated CI/CD pipelines to shorten and de-risk release cycles.

Full-Stack Developer — DnD ServicesOct 2020 – Dec 2021

Tunis, Tunisia

- Delivered client web and mobile applications using Angular, Ionic, and Node.js.
- Designed MongoDB and Firebase data layers and launched a hybrid mobile app to production.

EDUCATION

M.Sc., Computer Software & Media Applications — Higher Institute of Technology, Radès2020 – 2022

B.Sc., Computer Software Engineering — Higher Institute of Technology, Bizerte2017 – 2020
